

I joined Edmund Carr in the Summer of 2017 after completing my A levels at Great Baddow High School in Maths, History and Chemistry. After completing a 2-year Certificate in Finance, Accounting and Business, I entered my Level 7 Apprenticeship of which I have completed one year of the four in total. The apprenticeship allows me to experience both practical experience in an Accountancy practice as well as studying towards my professional qualification.

There is usually an exam every 3 months and I am given time away from my work to attend courses and revision lessons at a local college. By working in the Audit and Accounts department I am given valuable experience in working with several different entities such as schools, charities, and small businesses. The audit work experience enhances my understanding of the audit theory and makes the college courses easier to understand.

Outside of my work and studies I enjoy playing netball and going to the gym.
